

Our makerspace gives you low-cost use of an open and accessible workshop right in the heart of Liverpool. We provide a home for startup and established businesses, tinkerers, and creatives all in a friendly environment with the tools to do your best work.

Our facilities include an extensive electronics workbench, textile fabrication equipment, laser cutters and engravers, woodworking tools, drills, mills, CNC routers, 3D printers, sublimination printers, heat presses, and much more. . .

We also host lots of community-run events, many of which are free to attend, and we are a popular venue for a wide range of local user and shared interest groups.

So check the public calendar on our website, find one that interests you and drop by. **We hope to see you soon!**
